

# JOSEPH ELSAYYID

joseph.elsayyid@yale.edu | elsayyidjoseph@gmail.com | josephelsayyid.com | New Haven, CT

Technology builder and Yale SOM Technology Management student who has launched campus technology programs, shipped software and hardware systems, taught hands-on emerging technology, and worked across AI, healthcare, cybersecurity, and semiconductors.

**Languages:** Certified proficiency in Mandarin Chinese, Arabic, and Spanish; conversational French.

## EDUCATION

### YALE SCHOOL OF MANAGEMENT

Master of Management Studies (M.M.S.), Technology Management

New Haven, CT

Expected May 2027

### YALE UNIVERSITY

B.S., Electrical Engineering & Computer Science; GPA: 3.7

New Haven, CT

2026

- Yale Science, Technology and Research Scholar.

## TECHNOLOGY BUILDING & LEADERSHIP

### YALE COLLEGE COUNCIL - TECHNOLOGY DIVISION

New Haven, CT

Founder & Chair; Elected YCC Senator

2025-2026

- Founded YCC Tech (ycctech.org) as Yale College Council's builder hub and led an 11-member fellow team creating infrastructure, funding, and events that help students ship useful technology for Yale.
- Created a \$200-\$500 Bounty Board for one-week software builds; commissioned a Yale CAS starter kit plus APIs for campus rooms, dining, events, and geospatial data, with written specs, acceptance criteria, public repos, demos, and payment on delivery.
- Launched \$40-\$200 hardware microgrants, the \$1,000 YCC Innovation Prize, alumni tech talks, agentic-AI workshops, and hackathons; coordinated proposal review, judges, funding decisions, communications, and cross-campus execution.

### YALE YOUNG GLOBAL SCHOLARS, YALE UNIVERSITY

New Haven, CT

Course Instructor

Summer 2026

- Designed and taught three original intensive seminars for students from 159 countries on embedded/edge systems, health-data technology, cyber conflict, semiconductor supply chains, and technological dependence.
- Built working hardware/software prototypes for demonstrations and hands-on activities, using technical builds to move students from abstract discussion into testing how real systems behave under practical constraints.
- Led a CubeSat program in which students created sensing devices for CubeSat-style missions; guided problem selection, sensor choice, system design, prototyping, testing, and final presentations while owning curriculum and project coaching.

### EDGEPULSE

Yale University

Builder - Physiological Sensing System

2026

- Built an Arduino/Python sensing testbed combining optical pulse data with accelerometer and gyroscope signals; created synchronized capture, CSV logging, plotting, and motion-labeling tools to study signal quality during movement.
- Prototyped with an Arduino Nano 33 BLE Sense Rev2 and MAX30102 optical pulse sensor; captured timestamped accelerometer and gyroscope data at roughly 50 Hz for synchronized pulse-and-motion analysis.

### IEEE YALE STUDENT BRANCH

New Haven, CT

Automation Project Engineer

2023-2024

- Built a smart-composting prototype aimed at Yale's 14 dining halls, integrating sensing and automation around a practical campus operations problem.

## TECHNICAL EXPERIENCE

### KUAN LAB, YALE SCHOOL OF MEDICINE

New Haven, CT

Medical Imaging Data Systems Researcher

2026-Present

- Built Python infrastructure for large-scale 3D medical-imaging analysis, including chunked storage, graph construction, validation checks, and diagnostics.

### HKUST SPINTRONIC QUANTUM MATERIAL LAB

Hong Kong

AI Hardware-Software Research Intern

Summer 2025

- Built control and benchmarking workflows for an MTJ in-memory AI accelerator, measuring latency, throughput, energy, pruning, quantization, and sparsity across hardware/software constraints.

### YALE INTELLIGENT COMPUTING LAB

New Haven, CT

AI Systems Design Researcher

2024-2025

- Built and profiled transformer-deployment workflows for constrained edge platforms, comparing latency, memory, power, and accuracy across deployment choices.

### MARTIN ANDRAUD GROUP, UCLOUVAIN

Belgium

Software-Hardware Co-Design Intern

Summer 2024

- Integrated RISC-V control and calibration for a 22-nm mixed-signal compute-in-memory accelerator, improving system reliability by 25-45%.

### FUTURETEC

Amman, Jordan

Cyber Defense Intern

Summer 2023

- Used SIEM tooling to monitor corporate cyber threats across the Middle East, correlate live alerts and logs, investigate incidents, and prepare response recommendations.

## GLOBAL LEADERSHIP & POLICY

### U.S. DEPARTMENT OF STATE - NSLI-Y

Taiwan

Mandarin & Cultural Study Fellow

2021-2022

- One of 13 U.S. scholars selected for funded study at Wenzao Ursuline University; conducted Mandarin-language youth research on Taiwanese cultural and political identity.

### CONGRESS-BUNDESTAG / U.S. CONSULATE HAMBURG

Germany

Scholar & Youth Council Member

2021-2022

- Studied diplomacy, innovation policy, and European technology ecosystems; served on the advisory council to U.S. Consul General Darion Akins.

### PEACE & DIALOGUE LEADERSHIP INITIATIVE

Israel-Palestine

Fellow

2024-2025

- One of approximately 30 fellows in a program with West Point focused on security, U.S. Middle East policy, peacebuilding, and cross-border regional relationships.

**RECOGNITION:** U.S. Congressional Commendation | U.S. Department of State Fellow
