

JOSEPH ELSAYYID

Tel: (973) 876-7337 | Email: joseph.elsayyid@yale.edu | Website: josephelsayyid.com

Yale EECS engineer and Yale SOM M.M.S. candidate focused on hardware-software co-design, edge systems, and global technology, with professional Mandarin, Arabic, and Spanish proficiency

EDUCATION

YALE SCHOOL OF MANAGEMENT

Master of Management Studies, Technology Management

New Haven, CT

Expected Graduation: May 2027

- Relevant focus: global technology strategy, product management, innovation, entrepreneurship and management of technical orgs

YALE UNIVERSITY

Bachelor of Science, Electrical Engineering & Computer Science

New Haven, CT

May 2026

- GPA: 3.7; Yale Science, Technology and Research Scholar; Yale College Council Senator; Chair, YCC Tech Division
- Coursework: Hardware-software co-design, neural networks, systems programming, embedded systems

PROFESSIONAL EXPERIENCE

YALE YOUNG GLOBAL SCHOLARS, YALE UNIVERSITY

New Haven, CT

Course Instructor

Summer 2026

- Design and teach three intensive seminars to summer students on security engineering, embedded/edge software, device architecture and health-data systems
- Build embedded-system prototypes linking sensing, firmware logic and device constraints to reliability, power, privacy, security and geopolitics

SPINTRONIC QUANTUM MATERIAL LABORATORY

Hong Kong

AI Hardware-Software Research Intern

Summer 2025

- Benchmarked power, latency and throughput for MTJ-based in-memory AI accelerator, producing decision-ready evidence on feasibility, use cases and performance guarantees
- Translated hardware constraints into software requirements and partnered with hardware team to diagnose bottlenecks across model deployment, data movement and validation

YALE INTELLIGENT COMPUTING LAB

New Haven, CT

AI Systems Design Intern

2024 – 2025

- Developed deployment workflows for transformer models on constrained edge platforms, creating reproducible profiling metrics for latency, memory, power and accuracy tradeoffs
- Guided pruning, quantization and model-design decisions for IoT-edge applications by synthesizing technical benchmarks into recommendations for engineering stakeholders

MARTIN ANDRAUD GROUP, UCLOUVAIN

Louvain-la-Neuve, Belgium

Software-Hardware Co-Design Intern

Summer 2024

- Integrated RISC-V control firmware and calibration routines for a 22-nm mixed-signal compute-in-memory accelerator improving compute reliability by 25-45%
- Communicated system integration process through technical writing used by collaborators evaluating next-gen prototypes

YALE COLLEGE COUNCIL

New Haven, CT

Chair, Yale College Council Tech Division; Elected Senator

2024 – 2026

- Chaired cross-campus technology committee uniting Yale's largest tech organizations and research/industry leaders.
- Launched builder programs spanning paid software bounties, hardware grants, speaker events, hackathons and the YCC Innovation Prize to accelerate campus entrepreneurship
- Directed roadmap for Yale-facing technical infrastructure, prioritizing APIs and tools for dining, room availability, events, campus mapping and CAS-authenticated application development

YALE IEEE

New Haven, CT

Automation Project Engineer

2023 – 2024

- Built sensor-driven control software for smart composting prototype, coordinating mechanical and electrical requirements for planned deployment across 14 Yale dining halls

- **Languages:** Mandarin, Arabic and Spanish, professional working proficiency; French, conversational
- **Technical Skills:** Python, C/C++, Linux/Unix, PyTorch, embedded systems, Verilog, FPGA, RISC-V firmware, data pipelines
- **Honors:** Yale STARS Science Fellowship; U.S. State Department Fellow; U.S. Congressional Commendation
